Weary of paying such a high price for a lease, many operators will wait until winter hits before getting their new operation underway. That means it might be worth the extra wait to find an operator to work with. Mike Curwood With the growing success of producing in mid-Michigan and the growing demand for recreational marijuana, it is apparent there will be a shortage of both growers and processors in the future. With that in mind, we recommend gathering as many facts as possible when scouting a prospective grower or processor. In our experience, the quality of a grower can be judged by their ability to grow the product they are planning to sell. One way to determine this is to find out the capacity of their facility. Growers that operate small, in-home operations, will obviously not have the space to produce large quantities of product. Most companies operating in the state now are growing for recreational use. However, this industry is expected to be the largest consumer of electricity in the state, driving up the average cost of electricity in the state. The state's Energy Office estimates that the industry could be responsible for \$75 million annually in electricity costs. With the state's previous emphasis on hydroponic growing operations, the demand for all forms of hydroponics is expected to be high. These are only a few areas that should be considered before signing a lease. In the end, it is important to remember that every lease is not equal. This industry is growing quickly and many smaller operators will be swallowed up by larger companies. If you are an interested operator, the best way to be sure you get a high-quality experience is to work with a reputable operator that understands your business needs and goals. Mike Curwood, CEO and owner of Curwood Cannabis, is an entrepreneur and expert in the cannabis industry. He has been involved in the industry for more than a decade and has extensive experience in the cultivation, processing and retail sectors. Share this: The projected cost of the new building and facilities at the company's Denver facility has increased to \$20.2 million from \$17 million. The facility was originally expected to cost \$11.3 million. A new OTC stock listing of Canadian-based MediPharm Labs (CSE: ML; OTC: MEDIF) ("MediPharm Labs" or the "Company") is now trading at \$0 82157476af
